# Test Your Knowledge

Do you know me? I can be found on coolfacing slopes throughout much of the state. When I'm ready to be harvested, my roots are ground into many medicinal products, such as vitamins and

I am a fairly common small tree in Kentucky. My "muscular" trunk is my most easily identifiable feature. I have many other names such as ironwood, blue beech. Do you know me?

Answers to Test Your Knowledge can be found on page 17.

I have a face only a mother can love. You get to see me or my brothers and sisters every year. You may have heard of my cousin that only shows its face every 17 years. Who am I?

Have you seen these attached to the branches of your trees? Well, then your lucky! There are approximately 100 to 200 babies waiting to hatch. The babies will hatch out during late spring and look exactly like mom and dad and be ready to eat - just point me to the nearest aphid! What kind of insects will we become?
